## **DETAILED ACTION**

### ***Priority***

1. It is noted that this application appears to claim subject matter disclosed in prior copending Application No. 08/813438, now abandoned, filed on 03/10/97, and 08/747340, now US Patent 5,738,937 filed on 11/12/96. A reference to the prior application must be inserted as the first sentence of the specification of this application if applicant intends to rely on the filing date of the prior application under 35 U.S.C. 119(e) or 120. See 37 CFR 1.78(a). Appropriate correction is required.

2. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 08/813,438 filed on 03/10/97.

### ***Oath/Declaration***

3. It appears that the full given name of applicant, Carrbassett Baychar is not present in the signature or elsewhere in the papers. This application will not be passed to issue until the omitted name has been supplied or unless a statement has been supplied over the applicant's signature setting forth that the name as signed is the actual full name of applicant. See MPEP § 605.04.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

5. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Ogden (US 5,727,336).

Art Unit: 1771

Ogden teaches an insole made of a plurality of layers. In figure 8 and columns 12-13, Ogden shows that his insole may be made of a top layer which has apertures, to which is attached a nonwoven layer, to this is attached a cushiony urethane(foam), to which is affixed to an adhesive net material (a scrim), which the Examiner equates to be the same layers that Applicant claims. Ogden also suggests the moisture wicking and moisture absorbing capabilities of the laminate as a whole.

***Allowable Subject Matter***

6. Claims 2-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. These claims are indicated as allowable because there was no prior art found that suggests or teaches the moisture transfer system as claimed.
